To give you a better experience, we use cookies. Our Cookie Policy, Privacy Policy, and Terms of Service apply when using Kongregate's Services. OK So, let me tell you about the fun game Learn to Fly 2. There's this cool penguin from Antarctica who wants to fly all over snowmen and icebergs for free. He tried lots of gadgets but didn't succeed. Can you help him come up with new ideas and make his dream a reality? Because he needs to test everything first, he'll use a dummy to see if it's safe. Also, there are bad guys that he has to fight on the way! Let's put your helmet on and see how far we can fly! How It Works: The hard part is making tools for the penguin to fly. Once you get that right, flying is easy peasy! - Left and Right arrow keys or A and D: Tilt the dummy. - Spacebar or Mouse: Use your invention. Each one works differently, so it might take time to figure everything out. You'll have a test flight every day, and try to fly as long as you can. If you succeed, you'll win some money to fund future inventions. However, the penguin made lots of plans, and you'll need to save a lot of cash to try them all. Here are the types of inventions planned by the penguin: - Sleigh: Use it on the ramp to increase acceleration and take-off speed. - Glider: Kites, balloons, zeppelins, and more to increase speed and control. - Boost: Increase your speed after taking off using balloons, rockets, fireworks, etc. - Payload: Increases destroying powers so you can take down tough icebergs! You can also upgrade your ramp and fuel. Even though it's expensive, it'll be worth it when you fly as free as a bird! There's more to know! Try to defeat all of the penguin's enemies. The first is the snowman, and the last is the iceberg. Prepare many upgrades if you want to destroy them with a direct hit from your dummy! You can increase your reward by completing challenges. For example, you can get some dollars if you fly for a certain distance, reach an altitude, etc.! Also, you can win medals if you clear many challenges, so don't miss out on them! Are you ready to make the penguin's dream come true and achieve the perfect items to fly? Let's get started and see if we can also destroy all of his enemies on our journey! Other Games in this Series Your dreams were crushed by Icebergs that stopped you from flying. Now it's time to take revenge! Use your favorite controls, like A/D keys or mouse, to navigate through this epic game. Blast away barrels in a silent movie themed physics puzzler, and relive the thrill of Captain Ahab versus Moby Dick. Other features include: * Saving princesses from unexpected dangers * Being an ultimate assassin in stealth games * Escaping labs with lasers and rotating blades * Rescuing apocalyptic worlds from their own minds * Days of Monsters - a thrilling game jam experience Platforms, levels, and challenges vary widely, from saving baby chickens to managing savage alien hordes. Even Robinson Crusoe gets stranded on an Island! You'll have to fly with Peter Pan to rescue the Darling children or kick Justin Bieber outta here! These games offer retro, arcade, action, puzzle, and strategy elements, so get ready for a blast of epic stories and adventures! Try your hand at an ancient sport that's been enjoyed by royalty, hunters, and warriors for a staggering 4000 years! This game puts Leo on a mission to escape the Classroom - think it's Barca teaching Bieber football tricks instead? Meanwhile, in Candor, you're Argus, the legendary hero defending Wayland Keep against the Therion Empire. Sorry, no mobile games from us yet, but we've got some funny science jokes to share! Next up is Learn to Fly 3: a thrilling adventure where your penguin pilot soars through space in search of new worlds. Upgrade your rocket ship and explore the final frontier - collect funds, unlock items, and overcome challenges to reach your goal.
